ARYN WEATHERLY

SOFTWARE DEVELOPER

ABOUT

Energetic, hard-working and resilient. Lover of books, science, puzzles, art and video games. I attended school for massage therapy, radiology technology and physical therapy. I spent many years working in the health field only to realize I wanted to do something else with my life. It wasn't until a friend suggested I look into programming that really felt I found what I was meant to do for the rest of my life

Group projects:

Welcome to Nashville
- Team based project centered around creating itineraries for select groups of tourist through utilization of several different APIs.
- Utilized Zomato API to render a list of restaurants to the DOM and saved client's choice in restaurant to their itinerary.
- Styled the website with CSS.
- Main language used: Javascript

Nutshell/React
- Team based project that involved building a dashboard application to display a user's friends, messages, tasks, events, and news articles.
- Used React.js and Reactstrap to build and style the project.
- Each aspect of the application utilized CRUD functionality.
- Wire framing and planning were completed with db diagram and mockflow.

Front-End Capstone

Pass a Note
- Note sharing application built with React.Js.
- Utilized Adobe and Adobe XD to build all graphics used in the application.
- Used CSS, Bootstrap, and Bulma to style the login, registration, home page and all forms.
- Used Cloudinary to provide users with the ability to upload images.
